Darcy, I hope your meeting is going well. Following an update from Sarah Friday and discussion with Joan at RLT today, I think we can send something along these lines to Shaun. Do you want to forward to him, or should I?

Shaun,

On Friday 12/9 we received a request from PowerTech to withdraw their Class V UIC application for the injection zone that requires a Class I permit. This was in response to our informing them of the erroneous application. Further, since calculations indicate that disposal capacity in this zone won't be necessary, there's no need for a consequent Class I permit.

We think that you may want to close the loop w/ the Administrator now that we've received this withdrawal request from the applicant.

Our next steps are to review all our permitting materials to reflect this change and complete the revisions to the other items discussed with the Administrator. We expect to be ready for public notice in late January and will know that date more precisely later this week.

Bert Garcia
